CSE 579: Knowledge Representation and Reasoning

Automated Warehouse Scenario Project Part 2

Purpose

The course project will have four (4) requirements. The aim of part 2 is for you to use clingo to find the stable models of 3 basic ASP programs.

Objectives

Learners will be able to:

- Find the stable models for three basic ASP programs.

Technology Requirements

- Milestone 2 - Solutions to Basic Cling Problems Template
- Clingo

Project Description

In this milestone, you need to use clingo to find the stable models of 3 basic ASP programs. Following the problem template provided you will use clingo to find all the stable models of the program, fill in the input program, command line, and output in the tables in the given template. There will be at least one additional question to answer in the submission space for this milestone.

Directions

Download the template provided in your course within the “Project Overview page”, which includes three basic ASP programs. For each problem in the assignment, use clingo to identify all stable models of the ASP program. Fill in the input program, command line, and output in the respective table for each problem in the downloaded template from Step 1.

Note that an example problem and its solution are provided at the end of these instructions, along with a detailed guide on translating an ASP program into clingo's language.

After completing all three tables in the template, save the document as a PDF file named "your name_Automated Warehouse Scenario Project Part 2.pdf." In the Module 3 graded work section there is a submission space for your final PDF and a short quiz related to the work you completed in Milestone 2. The quiz will have three multiple-choice, single-correct questions, one for each problem.

Submission Directions for Project Deliverables

You are given a limited number three (3) of attempts to submit your best work. The number of attempts is given to anticipate any submission errors you may have in regards to properly submitting your best work within the deadline (e.g., accidentally submitting the wrong paper). It is not meant for you to receive multiple rounds of feedback and then one (1) final submission. Only your most recent submission will be assessed.

You must submit your Automated Warehouse Scenario Project Part 2 deliverable in this submission space. Learners may not email or use other means to submit any assignment or project for review, including feedback and grading.

The Automated Warehouse Scenario Project Part 2 includes two (2) deliverables:

- **Quiz:** Submit the quiz questions.
- **Assignment Template**: Use the assignment template to upload your report as a .doc or .pdf. Please use the following format to name your assignment file: *Your Name_CSE 579_Automated Warehouse Scenario Project Part 2*

You will be assessed on your completion and answers to the questions in the quiz. There will be one multiple-choice, application question in this milestone.

You will have 180 minutes to complete this milestone and three (3) attempts to submit your work.To submit your work follow the directions below:

1. Navigate to your course and click on the "**Submission: Automated Warehouse Scenario Project Part 2**" submission space
2. Click "**Take the quiz**" in the upper right corner
3. Complete each question.
4. Please upload your completed template.
    a. Select Choose file.
    b. Select your document
5. When you are finished, click "**Submit Quiz.**"
    a. If you would like to retake the quiz, click "**Take the Quiz Again.**"

Evaluation

Complete the questions in the Automated Warehouse Scenario Project Part 2 submission space in your Canvas course. This milestone is worth 45 points.
