CSE 579: Knowledge Representation and Reasoning

Automated Warehouse Scenario Project Part 4

Purpose

Part 4 is the individual project report for your finished project.

Technology Requirements

CSE 579_course-project-report-kit_AAAI
Clingo

Project Description

This will be your final course project report. This can be submitted as part of the (optional) MCS portfolio submission.

Directions

For this deliverable, you will need to use the AAAI report template in the Course Project Report Kit (see below), and submit your report on the "My Assignment" page. Your report must include sections that provide the following information:

- Your problem statement
- Project background (e.g., basic knowledge of ASP, external online materials that helped in your project)
- Your approach to solving the problem
- Main results and analysis
- Conclusion (including your self-assessment of your work)
- Opportunities for future work

The clarity of your report will also be graded. When you write your report, you may assume that it will be reviewed by your colleagues who don't know KR. Your goal is to let them know how you solve this problem using the techniques from KR. Since you cannot describe the whole program in detail, you need to discuss your most important (or difficult) rules and explain what they represent and/or what you have achieved with each rule. With your report, ideally, your colleagues (i) would roughly

understand how the problem is solved and, without any background knowledge, feel your approach technically sound; and (ii) can replicate your project easily once they learn the basics of ASP and clingo.

Additional Report Requirements
The report should be at least 3 pages, at most 4 pages (2-column format, per the report model/template), including any references, and adhere to AAAI style guidelines. (This means you cannot change the font size or spacing.) The project report kit includes Word and Latex templates, and you may utilize an unlimited appendix section for other materials (e.g., ASP programs).

Note: You must submit your report in .pdf file format (.doc or .docx are not allowed).

Submission Directions for Project Deliverables

You are given a limited number of attempts to submit your best work. The number of attempts is given to anticipate any submission errors you may have in regards to properly submitting your best work within the deadline (e.g., accidentally submitting the wrong paper). It is not meant for you to receive multiple rounds of feedback and then one (1) final submission. Only your most recent submission will be assessed.

You must submit your Automated Warehouse Scenario Project Part 4 deliverable in this submission space. Learners may not email or use other means to submit any assignment or project for review, including feedback, and grading.

The Automated Warehouse Scenario Project Part 4 includes one (1) deliverable:

Project Report PDF: You must submit your final report as a single PDF, using the provided template: Template_CSE 579_Course Project Report Kit_AAAI. Your file upload must follow the correct naming convention: Your Name_CSE 579_*Automated Warehouse Scenario Project Part 4*.

You have unlimited attempts for this assignment until the due date, however only your most recent submission will be assessed. To submit your work follow the directions below:

1. Navigate to your course and click on the "**Submission: Automated Warehouse Scenario Project Part 4**" submission space
2. Click "**Start Attempt**" in the upper right corner
3. Click "**Upload File**" and add your template pdf document
    a. Your file should be named using the following format: *CSE579_FirstnameLastname_IndivProjectReport_mm-dd-yy.pdf*
    b. When finished, click "**Submit Assignment**"
    c. If needed: to resubmit the assignment

i. Click “**New Attempt**” and add your file submission again
ii. When finished, click “**Submit Assignment**”

Note: You must submit your report in .pdf file format.

If you have questions about how to submit an assignment in Canvas please review the Canvas Student Guide for more information about assignment submission.

Evaluation

This is a manually graded assignment. Please review the submission page for more information related to the grading rubric. This component of the project is worth 150 points.

For part 4, the plagiarism rate must not exceed 40%. If the plagiarism rate is above 40%, three points will be deducted.
